

Abhishek Suryanarayana Bhat

Software Developer — Full Stack Development — Python — REST APIs — Web Development

Bengaluru, Karnataka | (+91) 6366098298 | 23btrsn008@jainuniversity.ac.in

LinkedIn | GitHub | Portfolio

Professional Summary

Computer Science Engineering student with a strong interest in software development, web technologies, and automation. Skilled in Python, HTML, CSS, JavaScript, REST APIs, Git, GitHub, Docker, and Flask, with practical experience gained through internships and academic projects. Experienced in developing web applications, automation solutions, and backend systems while applying problem-solving and analytical skills to real-world challenges. Passionate about continuous learning, exploring emerging technologies, and building efficient, scalable, and user-focused software solutions.

Education

B.Tech in Computer Science Engineering

May 2027

Jain Deemed-to-be University

CGPA: 8.70

Relevant Coursework: Front-End Development, Back-End Development, Software Development

Technical Skills

- **Programming Languages:** Python, JavaScript
- **Web Technologies:** HTML, CSS, Flask, REST APIs
- **Tools & Technologies:** Git, GitHub, Docker, MongoDB, Version Control
- **Core Areas:** Full Stack Development, Web Development, Backend Development, API Development, Automation & Scripting

Professional Experience

Infocon International

Jun–Aug 2025

Automation and Scripting Intern — Bengaluru, Karnataka, India

- Automated development workflows using Python, reducing manual setup effort and improving productivity.
- Developed utilities for parsing, processing, and validating data across multiple file formats.
- Improved workflow efficiency through automation scripts and structured technical documentation.
- Assisted in testing, debugging, and maintaining automation solutions to ensure reliability.
- Collaborated with developers to optimize scripting workflows and deployment processes.
- Enhanced existing scripts to improve performance, maintainability, and usability.

Projects

AI-Powered Legal Documentation Assistant

2025–2026

Tech Stack: Python, Flask, NLP, OpenAI API

Developed an AI-powered application for legal document generation, summarization, and analysis using NLP and REST API integration. Leveraged AI-driven text processing to automate legal workflows, improve document accuracy, and streamline information extraction.

AI Career Guidance Platform

2025

Tech Stack: HTML, CSS, JavaScript, Python, Flask

Built a full-stack web application that helps students explore career paths, required skills, and learning opportunities through an interactive interface.

MediCare Hospital Management System

2026

Tech Stack: Python, Flask, MongoDB, Docker

Developed a full-stack hospital management system for patient records, appointment scheduling, and billing management using Flask, MongoDB, and Docker.

Certifications

- Python Programming (**IIT Kanpur**)
- REST API Development and Testing (**Udemy**)
- Full Stack Development (**Udemy**)
